INDEX TO VOLUME 108

Author index*

A

Abboud RT, Fera T, Johal S, Richter A, Gibson N: Effect of smoking on plasma neutrophil elastase levels. 1986; 108:294-300
Abelow AC (*see* O'Morain et al). 1986; 108:430-5
Agterberg J (*see* Bleeker et al). 1986; 108:448-55
Albrecht RM (*see* O'Rourke et al). 1986; 108:206-12
Allen CM (*see* Glas-Greenwalt et al). 1986; 108:415-22
Anast C (*see* Beard et al). 1986; 108:498-505
Andreoli SP, Mallett CP, Bergstein JM: Role of glutathione in protecting endothelial cells against hydrogen peroxide oxidant injury. 1986; 108:190-8
Aoyama H, Kamiyama Y, Ukikusa M, Ozawa K: Clinical significance of hippurate-synthesizing capacity in surgical patients with liver disease: a metabolic tolerance test. 1986; 108:456-60
Arceci R (*see* Beard et al). 1986; 108:498-505
Arend R (*see* Gourley et al). 1986; 108:436-41
Arrizurieta E (*see* Martin et al). 1986; 108:241-5
Astiz ME (*see* Rackow et al). 1986; 108:349-53

B

Bakker JC (*see* Bleeker et al). 1986; 108:448-55
—— (*see* van der Plas et al). 1986; 108:253-60
Barfi G (*see* Yatziv et al). 1986; 108:365-8
Barnard JA, Ghishan FK: Methylprednisolone accelerates the ontogeny of sodium-taurocholate cotransport in rat ileal brush border membranes. 1986; 108:549-55
Bastida E, Escolar G, Ordinas A, Jamieson GA: Morphometric evaluation of thrombogenesis by microvesicles from human tumor cell lines with thrombin-dependent (U87MG) and adenosine diphosphate–dependent (SKNMC) platelet-activating mechanisms. 1986; 108:622-7
Bear CE, Petrunka CN, Strasberg SM: Effect of sodium taurocholate on amiloride-inhibitable sodium uptake and on intracellular pH of isolated rat hepatocytes. 1986; 108:109-16
Beard CJ, Key L, Newburger PE, Ezekowitz RAB, Arceci R, Miller B, Proto P, Ryan T, Anast C, Simons ER: Neutrophil defect associated with malignant infantile osteopetrosis. 1986; 108:498-505
Beck JR (*see* Blakowski et al). 1986; 108:117-20
Beck WS: Drugs and the intestinal absorption of folate. 1986; 108:263-4 (Editorial)
Begley JA (*see* Hall et al). 1986; 108:325-31
Benigni A, Zoja C, Remuzzi A, Orisio S, Piccinelli A, Remuzzi G: Role of renal prostaglandins in normal and nephrotic rats with diet-induced hyperfiltration. 1986; 108:230-40
Bergstein JM (*see* Andreoli et al). 1986; 108:190-8
Berrios X, Quesney F, Morales A, Blazquez J, Lagomarsino E, Bisno AL: Acute rheumatic fever and poststreptococcal glomerulonephritis in an open population: comparative studies of epidemiology and bacteriology. 1986; 108:535-42
Bidani AK (*see* Lin et al). 1986; 108:150-4
Bisno AL (*see* Berrios et al). 1986; 108:535-42
Bitzel D (*see* Middendorf et al). 1986; 108:577-80

*July, pp 1-76; August, pp 77-168; September, pp 169-262; October, pp 263-402; November, pp 403-520; December, pp 521-652.

Blakowski SA, Zacharski LR, Beck JR: Postoperative elevation of human peripheral blood monocyte tissue factor coagulant activity. 1986; 108:117-20
Blanckaert N, Servaes R, Leroy P: Measurement of bilirubin-protein conjugates in serum and application to human and rat sera. 1986; 108:77-87
Blazquez J (*see* Berrios et al). 1986; 108:535-42
Bleeker WK, van der Plas J, Agterberg J, Rigter G, Bakker JC: Prolonged vascular retention of a hemoglobin solution modified by cross-linking with 2-nor-2-formylpyridoxal 5-phosphate. 1986; 108:448-55
—— (*see* van der Plas et al). 1986; 108:253-60
Boerth LW (*see* Pennington et al). 1986; 108:44-52
Bolin RB (*see* White et al). 1986; 108:121-31, 132-7
Braillon A, Lee SS, Girod C, Peignoux-Martinot M, Valla D, Lebrec D: Role of portasystemic shunts in the hyperkinetic circulation of the portal hypertensive rat. 1986; 108:543-48
Brannan C (*see* Rendell et al). 1986; 108:286-93
Breuer R (*see* Niles et al). 1986; 108:489-97
Brittenham GM (*see* Gordeuk et al). 1986; 108:466-72
—— (*see* Huebers et al). 1986; 108:473-8
Brocca S (*see* Martin et al). 1986; 108:241-5
Brown MS (*see* Goldstein and Brown). 1986; 108:174-81 (State of the art)
Buhac I: Kinetics of albumin in cirrhosis. 1986; 108:517-8 (Letter)
Bunke M, Itskovitz H: Urinary excretion and renal production of prostaglandins E_2, $F_{2\alpha}$, and thromboxane B_2 in experimental diabetes mellitus. 1986; 108:332-9
Burnatowska-Hledin MA, Doyle TM, Eadie MJ, Mayor GH: 1,25-Dihydroxyvitamin D_3 increases serum and tissue accumulation of aluminum in rats. 1986; 108:96-102

C

Calvanico NJ (*see* Kitt et al). 1986; 108:442-7
Canoso RT, de Oliveira RM: Characterization and antigenic specificity of chlorpromazine-induced antinuclear antibodies. 1986; 108:213-6
Carr ME Jr: Effect of hydroxyethyl starch on the structure of thrombin-and reptilase-induced fibrin gels. 1986; 108:556-61
Carroll JE, Landry AS, Elliott ME, Goodfriend TL: Effects of pH on adrenal angiotensin receptors and responses. 1986; 108:23-9
Cerbone A (*see* Di Minno et al). 1986; 108:246-52
Chariatte N (*see* Cryz et al). 1986; 108:182-9
Chen MG (*see* Gallicchio et al). 1986; 108:199-205
Cherniack NS (*see* Daniel et al). 1986; 108:1-2 (Editorial)
Chervu LR (*see* O'Morain et al). 1986; 108:430-5
Chiu DT-Y (*see* Wagner et al). 1986; 108:315-24
Choi SC (*see* Fletcher et al). 1986; 108:217-23
Christensen TG (*see* Niles et al). 1986; 108:489-97
Chu RC (*see* Hall et al). 1986; 108:325-31
Churchill PC (*see* Lin et al). 1986; 108:150-4
Cianciaruso B (*see* Di Minno et al). 1986; 108:246-52
Clark DA, Dessypris EN: Effects of recombinant erythropoietin on murine megakaryocytic colony formation in vitro. 1986; 108:423-9
Clayton MEM (*see* Robbins et al). 1986; 108:340-5
Collen D (*see* Colucci et al). 1986; 108:53-9
Colucci M, Paramo JA, Collen D: Inhibition of one-chain and two-

chain forms of human tissue-type plasminogen activator by the fast-acting inhibitor of plasminogen activator in vitro and in vivo. 1986; 108:53-9
Combs M (*see* Van de List et al). 1986; 108:346-8
Conter RL, Porter-Fink V, Denbesten L, Roslyn JJ: In vivo gallbladder absorption: a new dual-isotope technique. 1986; 108: 360-4
Cortese A (*see* Di Minno et al). 1986; 108:246-52
Cosgriff JM (*see* Miller et al). 1986; 108:406-10
Crane RT (*see* Katzenstein et al). 1986; 108:155-60
Cross AS (*see* Cryz et al). 1986; 108:182-9
Cryz SJ Jr, Cross AS, Fürer E, Chariatte N, Sadoff JC, Germanier R: Activity of intravenous immune globulins against *Klebsiella*. 1986; 108:182-9
Csiba E (*see* Huebers et al). 1986; 108:473-8

D

Daiss W (*see* Jaschonek et al). 1986; 108:88-95
Daniel TM, Cherniack NS, Douglas JG, Kammer GM, Ratnoff OD: New names on the masthead. 1986; 108:1-2 (Editorial)
Das KM (*see* O'Morain et al). 1986; 108:430-5
de Oliveira RM (*see* Canoso and de Oliveira). 1986; 108:213-6
de Vries-van Rossen A (*see* van der Plas et al). 1986; 108:253-60
Denbesten L (*see* Conter et al). 1986; 108:360-4
Denny FW: The mystery of acute rheumatic fever and poststreptococcal glomerulonephritis. 1986; 108:523-4 (Editorial)
Dessypris EN (*see* Clark and Dessypris). 1986; 108:423-9
Deykin D (*see* Jakubowski et al). 1986; 108:616-21
Di Minno G, Cerbone A, Usberti M, Cianciaruso B, Cortese A, Farace MJ, Martinez J, Murphy S: Platelet dysfunction in uremia. II. Correction by arachidonic acid of the impaired exposure of fibrinogen receptors by adenosine diphosphate or collagen. 1986; 108:246-52
Dodds S (*see* Rendell et al). 1986; 108:286-93
Donahue PE (*see* Zarling et al). 1986; 108:7-10
Douglas JG (*see* Daniel et al). 1986; 108:1-2 (Editorial)
Doyle TM (*see* Burnatowska-Hledin et al). 1986; 108:96-102
Duma RJ (*see* Fletcher et al). 1986; 108:217-23
Duncan KA, Seaton RD, Savin VJ: Filtration by rat glomeruli after expansion of extracellular fluid volume. 1986; 108:309-14

E

Eadie MJ (*see* Burnatowska-Hledin et al). 1986; 108:96-102
Elliott ME (*see* Carroll et s361986; 108:23-9
Ellner JJ: Immune dysregulation in human tuberculosis. 1986; 108:142-9
Escolar G (*see* Bastida et al). 1986; 108:622-7
Evans HJ (*see* Fletcher et al). 1986; 108:217-23
Ezekowitz RAB (*see* Beard et al). 1986; 108:498-505

F

Faigel D (*see* Jakubowski et al). 1986; 108:616-21
Farace MJ (*see* Di Minno et al). 1986; 108:246-52
Fera T (*see* Abboud et al). 1986; 108:294-300
Fiksen-Olsen M (*see* Macias-Nunez et al). 1986; 108:30-6
Finch CA (*see* Huebers et al). 1986; 108:473-8
Finegold MJ (*see* Lifschitz et al). 1986; 108:37-43
Fink JN (*see* Kitt et al). 1986; 108:442-7
Fürer E (*see* Cryz et al). 1986; 108:182-9
Fleischner GM (*see* O'Morain et al). 1986; 108:430-5
Fletcher C, Pearson C, Choi SC, Duma RJ, Evans HJ, Qureshi GD: In vitro comparison of antiplatelet effects of β-lactam penicillins. 1986; 108:217-23
Folts JD (*see* O'Rourke et al). 1986; 108:206-12
Franklin TJ, Gregory H, Morris WP: Acceleration of wound healing by recombinant human urogastrone (epidermal growth factor). 1986; 108:103-8
Frohlich ED: A genetic and cell biologic mechanism for atherosclerosis: a decade later. 1986; 108:170-1 (Editorial)

G

Gallicchio VS, Gamba-Vitalo C, Watts TD, Chen MG: In vivo and in vitro modulation of megakaryocytopoiesis and stromal colony formation by lithium. 1986; 108:199-205
Gamba-Vitalo C (*see* Gallicchio et al). 1986; 108:199-205
Germanier R (*see* Cryz et al). 1986; 108:182-9
Gewurz H (*see* Zeller et al). 1986; 108:567-76
Ghishan FK (*see* Barnard and Ghishan). 1986; 108:549-55
Gibson N (*see* Abboud et al). 1986; 108:294-300
Girod C (*see* Braillon et al). 1986; 108:543-48
Glas-Greenwalt P, Hall JM, Panke TW, Kant KS, Allen CM, Pollak VE: Fibrinolysis in health and disease: abnormal levels of plasinogen activator, plasminogen activator inhibitor, and protein C in thrombotic thrombocytopenic purpura. 1986; 108:415-22
Goldstein JL, Brown MS: Hyperlipidemia in coronary heart disease: a biochemical genetic approach. 1986; 108:174-81 (State of the art)
Goodfriend TL (*see* Carroll et al). 1986; 108:23-9

Subject index*

A

Absorption
Absorption of carbonyl iron (Huebers et al). 1986; 108:473-8
Drugs and the intestinal absorption of folate (Beck). 1986; 108:263-4 (Editorial)
Acetylcholinesterase
Endo- and exovesiculation and the structure of the human red cell membrane (Schrier et al). 1986; 108:265-71
β-*N*-Acetylglucosaminidase
Lysosomal hydrolases in blood-derived macrophages of patients with I-cell disease (Yatziv et al). 1986; 108:365-8
Acidosis
Urinary inhibitor of the ammoniagenic response to acute acidosis is a prostaglandin (Tannen and Goyal). 1986; 108:277-85
Acivicin
Effect of acivicin on glutamine transport by rat renal brush border membrane vesicles (Sastrasinh and Sastrasinh). 1986; 108:301-8
Adenosine
Effect of allopurinol on the renovascular responses to adenosine (Macias-Nunez et al). 1986; 108:30-6
Effect of theophylline on the initiation phase of postischemic acute renal failure in rats (Lin et al). 1986; 108:150-4
Adenosine diphosphate
Morphometric evaluation of thrombogenesis by microvesicles from human tumor cell lines with thrombin-dependent (U87MG) and adenosine diphosphate–dependent (SKNMC) platelet-activating mechanisms (Bastida et al). 1986; 108:622-7
Platelet dysfunction in uremia. II. Correction by arachidonic acid of the impaired exposure of fibrinogen receptors by adenosine diphosphate or collagen (Di Minno et al). 1986; 108:246-52
Platelet prostacyclin binding in smokers (Jaschonek et al). 1986; 108:88-95
Adenosine monophosphate, cyclic
Plasma 1,25$(OH)_2D_3$ response to parathyroid hormone, cyclic adenosine monophosphate, and phosphorus depletion in the spontaneously hypertensive rat (Young et al). 1986; 108:562-6
Adenosine triphosphate
Iron release from transferrin: synergistic interaction between adenosine triphosphate and an ammonium sulfate fraction of hemolysate (Pollack and Weaver). 1986; 108:411-4
Adrenal angiotensin receptors
Effects of pH on adrenal angiotensin receptors and responses (Carroll et al). 1986; 108:23-9
α_1-Adrenoceptor
Cumulative effects of quinidine and aspirin on bleeding time and platelet α_1-adrenoceptors: potential mechanism of bleeding diathesis in patients receiving this combination (Lawson et al). 1986; 108:581-86
Albumin
Inhibition of glycation of albumin and hemoglobin by acetylation in vitro and in vivo (Rendell et al). 1986; 108:286-93
Kinetics of albumin in cirrhosis (Buhac). 1986; 108:517-8 (Letter); (Rector) 1986; 108:518 (Letter reply)
Alcohol
Effect of moderate prolonged ethanol ingestion on intestinal disaccharidase activity and histology (Zarling et al). 1986; 108:7-10
Aldosterone
Effects of pH on adrenal angiotensin receptors and responses (Carroll et al). 1986; 108:23-9
Failure of potassium adaptation in vivo in the colon of aldosterone-deficient rats (Martin et al). 1986; 108:241-5
Allopurinol
Effect of allopurinol on the renovascular responses to adenosine (Macias-Nunez et al). 1986; 108:30-6
Aluminum
1,25-Dihydroxyvitamin D_3 increases serum and tissue accumulation of aluminum in rats (Burnatowska-Hledin et al). 1986; 108:96-102
Alveolar macrophage
Iron binding, internalization, and fate in human alveolar macrophages (McGowan et al). 1986; 108:587-95
American Federation for Clinical Research, Midwest Section
Program. 1986; 108:371-402

*July, pp 1-76; August, pp 77-168; September, pp 169-262; October, pp 263-402; November, pp 403-520; December, pp 521-652.

Amiloride
Effect of sodium taurocholate on amiloride-inhibitable sodium uptake and on intracellular pH of isolated rat hepatocytes (Bear et al). 1986; 108:109-16
Aminotransferase
Serum aspartate aminotransferase storage and the effect of pyridoxal phosphate (Niblock et al). 1986; 108:461-5
Ammonium sulfate
Iron release from transferrin: synergistic interaction between adenosine triphosphate and an ammonium sulfate fraction of hemolysate (Pollack and Weaver). 1986; 108:411-4
Amyloidosis
Presence of a plasma transthyretin (prealbumin) variant in familial amyloidotic polyneuropathy in a kindred of Greek origin (Saraiva et al). 1986; 108:17-22
Angiotensin
Effects of pH on adrenal angiotensin receptors and responses (Carroll et al). 1986; 108:23-9
Antibody
Characterization and antigenic specificity of chlorpromazine-induced antinuclear antibodies (Canoso and de Oliveira). 1986; 108:213-6
Antigen
Characterization and antigenic specificity of chlorpromazine-induced antinuclear antibodies (Canoso and de Oliveira). 1986; 108:213-6
Immune dysregulation in human tuberculosis (Ellner). 1986; 108:142-9
Role of the Vi antigen of *Salmonella typhi* in resistance to host defense in vitro (Looney and Steigbigel). 1986; 108:506-16
Antinuclear antibody
Characterization and antigenic specificity of chlorpromazine-induced antinuclear antibodies (Canoso and de Oliveira). 1986; 108:213-6
Antiplatelet effects
In vitro comparison of antiplatelet effects of β-lactam penicillins (Fletcher et al). 1986; 108:217-23
Antisera
Treatment of bacterial infections with specific antisera: a venerable idea born again (Graham). 1986; 108:172-3 (Editorial)
Arachidonic acid
Lipoxygenation of arachidonic acid by differentiated and undifferentiated human promyelocytic HL-60 cells (Ziboh et al). 1986; 108:161-6
Platelet dysfunction in uremia. II. Correction by arachidonic acid of the impaired exposure of fibrinogen receptors by adenosine diphosphate or collagen (Di Minno et al). 1986; 108:246-52
Arthritis
1,25-Dihydroxyvitamin D_3 receptors in lymphocytes from patients with rheumatoid arthritis (Manolagas et al). 1986; 108:596-600
Aspartate aminotransferase
Serum aspartate aminotransferase storage and the effect of pyridoxal phosphate (Niblock et al). 1986; 108:461-5
Aspirin
Cumulative effects of quinidine and aspirin on bleeding time and platelet α_2-adrenoceptors: potential mechanism of bleeding diathesis in patients receiving this combination (Lawson et al). 1986; 108:581-86
Inhibition of glycation of albumin and hemoglobin by acetylation in vitro and in vivo (Rendell et al). 1986; 108:286-93
Low-dose enteric-coated aspirin: a practical approach to continuous-release low-dose aspirin and presystemic acetylation of human platelet cyclooxygenase (Jakubowski et al). 1986; 108:616-21
Atherosclerosis
A genetic and cell biologic mechanism for atherosclerosis: a decade later (Frohlich). 1986; 108:170-1 (Editorial)
Hyperlipidemia in coronary heart disease: a biochemical genetic approach (Goldstein and Brown). 1986; 108:174-81 (State of the art)

B

Bacteria; *see also* **Infection**
Treatment of bacterial infections with specific antisera: a venerable idea born again (Graham). 1986; 108:172-3 (Editorial)
Barbiturate
Inhibition of canine platelet aggregation by barbiturates (O'Rourke et al). 1986; 108:206-12
The Bethany Medical Center
The first coronary care unit: Bethany Medical Center (Warren). 1986; 108:261-2 (Cover illus. note)
Bile
Effect of sodium taurocholate on amiloride-inhibitable sodium uptake and on intracellular pH of isolated rat hepatocytes (Bear et al). 1986; 108:109-16
Effect of tauroursodeoxycholate on the biliary transport maximum of sulfobromophthalein in the rat (Kanai and Kitani). 1986; 108:601-7
Bilirubin
Bilirubin conjugate excretion and bilirubin uridine diphosphoglucuronyltransferase activity in nonjaundiced homozygous and heterozygous Gunn rats (Gourley et al). 1986; 108:436-41
Measurement of bilirubin-protein conjugates in serum and application to human and rat sera (Blanckaert et al). 1986; 108:77-87
Bleeding time
Cumulative effects of quinidine and aspirin on bleeding time and platelet α_2-adrenoceptors: potential mechanism of bleeding diathesis in patients receiving this combination (Lawson et al). 1986; 108:581-6
Blood cell; *see specific cell*
Bowel disease
Chromium 51–ethylenediaminetetraacetate test: a useful test in the assessment of inflammatory bowel disease (O'Morain et al). 1986; 108:430-5
Bromide
Sweat bromide excretion in cystic fibrosis (Miller et al). 1986; 108:406-10
Bronchial reactivity
Comparison of cutaneous and bronchial reactivity to leukotriene D_4 in humans (Greenberger et al). 1986; 108:70-5
Burch, George E.
George E. Burch, M.D. (1910-1986) (Warren). 1986; 108:167-8 (Cover illus. note)

C

Calcitriol
1,25-Dihydroxyvitamin D_3 increases serum and tissue accumulation of aluminum in rats (Burnatowska-Hledin et al). 1986; 108:96-102
1,25-Dihydroxyvitamin D_3 receptors in lymphocytes from patients with rheumatoid arthritis (Manolagas et al). 1986; 108:596-600
Plasma $1,25(OH)_2D_3$ response to parathyroid hormone, cyclic adenosine monophosphate, and phosphorus depletion in the spontaneously hypertensive rat (Young et al). 1986; 108:562-6
Calcium
Verapamil impairs human neutrophil chemotaxis by a non-calcium-mediated mechanism (Pennington et al). 1986; 108:44-52
Carbonyl iron
Absorption of carbonyl iron (Huebers et al). 1986; 108:473-8
Cell biology
A genetic and cell biologic mechanism for atherosclerosis: a decade later (Frohlich). 1986; 108:170-1 (Editorial)
Central Society for Clinical Research
Program. 1986; 108:371-402
Wither we goest? Notes of a society watcher plus other comments and thoughts (Schiff). 1986; 108:3-6 (Special feature)
Chemiluminescence
Aggregated C-reactive protein binds to human polymorphonuclear leukocytes and potentiates Fc receptor–mediated chemiluminescence (Zeller et al). 1986; 108:567-76

Chemotaxis
Interleukin-2–induced chemotaxis of human T-lymphocytes (Robbins et al). 1986; 108:340-5
Verapamil impairs human neutrophil chemotaxis by a non-calcium-mediated mechanism (Pennington et al). 1986; 108:44-52
Child
Polyethylene glycol polymers of low molecular weight as probes of intestinal permeability. II. Application to infants and children with intestinal disease (Lifschitz et al). 1986; 108:37-43
Chloride
Cystic fibrosis: consensus on chloride (Jones). 1986; 108:403-5 (Editorial)
Chlorpromazine
Characterization and antigenic specificity of chlorpromazine-induced antinuclear antibodies (Canoso and de Oliveira). 1986; 108:213-6
Chromatography
Rapid cation-exchange high-performance liquid chromatographic procedure for the separation and quantitation of hemoglobins S, C, and O Arab in cord blood samples (Wilson et al). 1986; 108:138-41
Chromium 51–ethylenediaminetetraacetate
Chromium 51–ethylenediaminetetraacetate test: a useful test in the assessment of inflammatory bowel disease (O'Morain et al). 1986; 108:430-5
Cigarette smoking
Platelet prostacyclin binding in smokers (Jaschonek et al). 1986; 108:88-95
Cimetidine
Effect of cimetidine on indomethacin-induced damage in cultured rat gastric mucosal cells: comparison with prostaglandin (Hiraishi et al). 1986; 108:608-15
Cirrhosis
Kinetics of albumin in cirrhosis (Buhac). 1986; 108:517-8 (Letter); (Rector) 1986; 108:518 (Letter reply)
Coagulation
Postoperative elevation of human peripheral blood monocyte tissue factor coagulant activity (Blakowski et al). 1986; 108:117-20
Cobalamin
Methionine synthetase activity of human lymphocytes both replete in and depleted of vitamin B_{12} (Hall et al). 1986; 108:325-31
Collagen
Platelet dysfunction in uremia. II. Correction by arachidonic acid of the impaired exposure of fibrinogen receptors by adenosine diphosphate or collagen (Di Minno et al). 1986; 108:246-52
Colon
Failure of potassium adaptation in vivo in the colon of aldosterone-deficient rats (Martin et al). 1986; 108:241-5
Cord blood
Rapid cation-exchange high-performance liquid chromatographic procedure for the separation and quantitation of hemoglobins S, C, and O Arab in cord blood samples (Wilson et al). 1986; 108:138-41
Coronary care unit
The first coronary care unit: Bethany Medical Center (Warren). 1986; 108:261-2 (Cover illus. note)
Coronary heart disease
Hyperlipidemia in coronary heart disease: a biochemical genetic approach (Goldstein and Brown). 1986; 108:174-81 (State of the art)
Correspondence
Letters. 1986; 108:517-8
Cover illustrations
Cover illustration notes. 1986; 108:76, 167-8, 261-2, 369-70, 519-20, 635-6
Cyclic adenosine monophosphate
Plasma $1,25(OH)_2D_3$ response to parathyroid hormone, cyclic adenosine monophosphate, and phosphorus depletion in the spontaneously hypertensive rat (Young et al). 1986; 108:562-6
Cyclooxygenase
Low-dose enteric-coated aspirin: a practical approach to continuous-release low-dose aspirin and presystemic acetylation of human platelet cyclooxygenase (Jakubowski et al). 1986; 108:616-21
Cystic fibrosis
Cystic fibrosis: consensus on chloride (Jones). 1986; 108:403-5 (Editorial)
Sweat bromide excretion in cystic fibrosis (Miller et al). 1986; 108:406-10
Cytomegalovirus
Successful treatment of murine cytomegalovirus disease does not prevent latent virus infection (Katzenstein et al). 1986; 108:155-60

D

Day, Hughes
The first coronary care unit: Bethany Medical Center (Warren). 1986; 108:261-2 (Cover illus. note)
Diabetes mellitus
Urinary excretion and renal production of prostaglandins E_2, $F_{2\alpha}$, and thromboxane B_2 in experimental diabetes mellitus (Bunke and Itskovitz). 1986; 108:332-9
Diet
Role of renal prostaglandins in normal and nephrotic rats with diet-induced hyperfiltration (Benigni et al). 1986; 108:230-40
1,25-Dihydroxyvitamin D_3
1,25-Dihydroxyvitamin D_3 increases serum and tissue accumulation of aluminum in rats (Burnatowska-Hledin et al). 1986; 108:96-102
1,25-Dihydroxyvitamin D_3 receptors in lymphocytes from patients with rheumatoid arthritis (Manolagas et al). 1986; 108:596-600
Plasma $1,25(OH)_2D_3$ response to parathyroid hormone, cyclic adenosine monophosphate, and phosphorus depletion in the spontaneously hypertensive rat (Young et al). 1986; 108:562-6
Disaccharidase
Effect of moderate prolonged ethanol ingestion on intestinal disaccharidase activity and histology (Zarling et al). 1986; 108:7-10
Drake Hotel
The Drake Hotel. 1986; 108:369-70 (Cover illus. note)
Drug interaction
Iron release from transferrin: synergistic interaction between adenosine triphosphate and an ammonium sulfate fraction of hemolysate (Pollack and Weaver). 1986; 108:411-4

E

Edema
Absence of lung edema in nephrotic rats (Rackow et al). 1986; 108:349-53
Editorials
Cystic fibrosis: Consensus on chloride (Jones). 1986; 108:403-5
Drugs and the intestinal absorption of folate (Beck). 1986; 108:263-4
Encore! (Warren). 1986; 108:169
Free radicals and prostanoid synthesis (Sedor). 1986; 108:521-2
A genetic and cell biologic mechanism for atherosclerosis: a decade later (Frohlich). 1986; 108:170-1
The mystery of acute rheumatic fever and poststreptococcal glomerulonephritis (Denny). 1986; 108:523-4
New names on the masthead (Daniel et al). 1986; 108:1-2
Treatment of bacterial infections with specific antisera: a venerable idea born again (Graham). 1986; 108:172-3
Endothelial cell
Role of glutathione in protecting endothelial cells against hydrogen peroxide oxidant injury (Andreoli et al). 1986; 108:190-8
Endotoxin
Synergistic toxicity of endotoxin and hemoglobin (White et al). 1986; 108:132-7

Endovesiculation
Endo- and exovesiculation and the structure of the human red cell membrane (Schrier et al). 1986; 108:265-71
Enteric-coating
Low-dose enteric-coated aspirin: a practical approach to continuous-release low-dose aspirin and presystemic acetylation of human platelet cyclooxygenase (Jakubowski et al). 1986; 108:616-21
Epidermal growth factor
Acceleration of wound healing by recombinant human urogastrone (epidermal growth factor) (Franklin et al). 1986; 108:103-8
Erythrocyte
Endo- and exovesiculation and the structure of the human red cell membrane (Schrier et al). 1986; 108:265-71
Red cell vesiculation—a common membrane physiologic event (Wagner et al). 1986; 108:315-24
Erythropoietin
Effects of recombinant erythropoietin on murine megakaryocytic colony formation in vitro (Clark and Dessypris). 1986; 108:423-9
Ethanol
Effect of moderate prolonged ethanol ingestion on intestinal disaccharidase activity and histology (Zarling et al). 1986; 108:7-10
Excretion
Simple method for monitoring 24-hour urinary urea nitrogen excretion (Middendorf et al). 1986; 108:577-80
Urine protein excretion in acute pancreatitis (Meier and Levitt). 1986; 108:628-34
Exovesiculation
Endo- and exovesiculation and the structure of the human red cell membrane (Schrier et al). 1986; 108:265-71
Extracellular fluid
Filtration by rat glomeruli after expansion of extracellular fluid volume (Duncan et al). 1986; 108:309-14

F

Familial amyloidotic polyneuropathy
Presence of a plasma transthyretin (prealbumin) variant in familial amyloidotic polyneuropathy in a kindred of Greek origin (Saraiva et al). 1986; 108:17-22
Fc receptors
Aggregated C-reactive protein binds to human polymorphonuclear leukocytes and potentiates Fc receptor-mediated chemiluminescence (Zeller et al). 1986; 108:567-76
Fibrin
Effect of hydroxyethyl starch on the structure of thrombin- and reptilase-induced fibrin gels (Carr). 1986; 108:556-61
Fibrinogen receptors
Platelet dysfunction in uremia. II. Correction by arachidonic acid of the impaired exposure of fibrinogen receptors by adenosine diphosphate or collagen (Di Minno et al). 1986; 108:246-52
Fibrinolysis
Fibrinolysis in health and disease: abnormal levels of plasminogen activator, plasminogen activator inhibitor, and protein C in thrombotic thrombocytopenic purpura (Glas-Greenwalt et al). 1986; 108:415-22
Folate; *see also* **Folic acid**
Drugs and the intestinal absorption of folate (Beck). 1986; 108:263-4 (Editorial)
Folic acid; *see also* **Folate**
Competitive inhibition of folic acid absorption in rat jejunum by triamterene (Zimmerman et al). 1986; 108:272-6
Formyl-methionyl-leucyl-phenylalanine
Verapamil impairs human neutrophil chemotaxis by a non-calcium-mediated mechanism (Pennington et al). 1986; 108:44-52
Forskolin
Effect of forskolin on the maintenance of platelet properties during storage (Siegl and Moroff). 1986; 108:354-9
Free radicals
Free radicals and prostanoid synthesis (Sedor). 1986; 108:521-2 (Editorial)
Furosemide
Alterations of intravascular volume: influence on renal susceptibility to ischemic injury (Zager). 1986; 108:60-9

G

β-Galactosidase
Lysosomal hydrolases in blood-derived macrophages of patients with I-cell disease (Yatziv et al). 1986; 108:365-8
Gallbladder
Effect of tauroursodeoxycholate on the biliary transport maximum of sulfobromophthalein in the rat (Kanai and Kitani). 1986; 108:601-7
In vivo gallbladder absorption: a new dual-isotope technique (Conter et al). 1986; 108:360-4
Genetics
A genetic and cell biologic mechanism for atherosclerosis: a decade later (Frohlich). 1986; 108:170-1 (Editorial)
Presence of a plasma transthyretin (prealbumin) variant in familial amyloidotic polyneuropathy in a kindred of Greek origin (Saraiva et al). 1986; 108:17-22
Glomerulonephritis
Acute rheumatic fever and poststreptococcal glomerulonephritis in an open population: comparative studies of epidemiology and bacteriology (Berrios et al). 1986; 108:535-42
The mystery of acute rheumatic fever and poststreptococcal glomerulonephritis (Denny). 1986; 108:523-4 (Editorial)
Glomerulus; *see also* **Glomerulonephritis**
Filtration by rat glomeruli after expansion of extracellular fluid volume (Duncan et al). 1986; 108:309-14
β-Glucuronidase
Lysosomal hydrolases in blood-derived macrophages of patients with I-cell disease (Yatziv et al). 1986; 108:365-8
Glutamine
Effect of acivicin on glutamine transport by rat renal brush border membrane vesicles (Sastrasinh and Sastrasinh). 1986; 108:301-8
Glutathione
Role of glutathione in protecting endothelial cells against hydrogen peroxide oxidant injury (Andreoli et al). 1986; 108:190-8
Glycoprotein
Serine proteases stimulate mucous glycoprotein release from hamster tracheal ring organ culture (Niles et al). 1986; 108:489-97
Growth
Acceleration of wound healing by recombinant human urogastrone (epidermal growth factor) (Franklin et al). 1986; 108:103-8
Nitrous oxide and vitamin B_{12} deficiency interact adversely on rat growth (Van de List et al). 1986; 108:346-8

H

Healing
Acceleration of wound healing by recombinant human urogastrone (epidermal growth factor) (Franklin et al). 1986; 108:103-8
Heart failure
Human and canine ventricular vasoactive intestinal polypeptide: decrease with heart failure (Unverferth et al). 1986; 108:11-6
Heart disease
Human and canine ventricular vasoactive intestinal polypeptide: decrease with heart failure (Unverferth et al). 1986; 108:11-6
Hyperlipidemia in coronary heart disease: a biochemical genetic approach (Goldstein and Brown). 1986; 108:174-81 (State of the art)
Hemoglobin
Effect of coupling of 2-nor-2-formylpyridoxal 5'-phosphate to stroma-free hemoglobin on oxygen affinity and tissue oxygenation: studies in the isolated perfused rat liver under conditions of normoxia and stagnant hypoxia (van der Plas et al). 1986; 108:253-60

Inhibition of glycation of albumin and hemoglobin by acetylation in vitro and in vivo (Rendell et al). 1986; 108:286-93
Prolonged vascular retention of a hemoglobin solution modified by cross-linking with 2-nor-2-formylpyridoxal 5′-phosphate (Bleeker et al). 1986; 108:448-55
Rapid cation-exchange high-performance liquid chromatographic procedure for the separation and quantitation of hemoglobins S, C, and O Arab in cord blood samples (Wilson et al). 1986; 108:138-41
Synergistic toxicity of endotoxin and hemoglobin (White et al). 1986; 108:132-7
Toxicity of human hemoglobin solution infused into rabbits (White et al). 1986; 108:121-31

Hemorrhage
Alterations of intravascular volume: influence on renal susceptibility to ischemic injury (Zager). 1986; 108:60-9

Hepatocyte
Effect of sodium taurocholate on amiloride-inhibitable sodium uptake and on intracellular pH of isolated rat hepatocytes (Bear et al). 1986; 108:109-16

Heredity
A genetic and cell biologic mechanism for atherosclerosis: a decade later (Frohlich). 1986; 108:170-1 (Editorial)
Presence of a plasma transthyretin (prealbumin) variant in familial amyloidotic polyneuropathy in a kindred of Greek origin (Saraiva et al). 1986; 108:17-22

Hippurate
Clinical significance of hippurate-synthesizing capacity in surgical patients with liver disease: a metabolic tolerance test (Aoyama et al). 1986; 108:456-60

HL-60 cells
Lipoxygenation of arachidonic acid by differentiated and undifferentiated human promyelocytic HL-60 cells (Ziboh et al). 1986; 108:161-6

Human tissue-type plasminogen activator
Inhibition of one-chain and two-chain forms of human tissue-type plasminogen activator by the fast-acting inhibitor of plasminogen activator in vitro and in vivo (Colucci et al). 1986; 108:53-9

Hydrogen peroxide
Role of glutathione in protecting endothelial cells against hydrogen peroxide oxidant injury (Andreoli et al). 1986; 108:190-8

Hydroxyethyl starch
Effect of hydroxyethyl starch on the structure of thrombin- and reptilase-induced fibrin gels (Carr). 1986; 108:556-61

Hyperbilirubinemia
Measurement of bilirubin-protein conjugates in serum and application to human and rat sera (Blanckaert et al). 1986; 108:77-87

Hypercalcemia
1,25-Dihydroxyvitamin D_3 increases serum and tissue accumulation of aluminum in rats (Burnatowska-Hledin et al). 1986; 108:96-102

Hyperferremia
Hyperferremia in immunosuppressed patients with acute nonlymphocytic leukemia and the risk of infection (Gordeuk et al). 1986; 108:466-72

Hyperfiltration
Role of renal prostaglandins in normal and nephrotic rats with diet-induced hyperfiltration (Benigni et al). 1986; 108:230-40

Hyperlipidemia
Encore! (Warren). 1986; 108:169 (Editorial)
A genetic and cell biologic mechanism for atherosclerosis: a decade later (Frohlich). 1986; 108:170-1 (Editorial)
Hyperlipidemia in coronary heart disease: a biochemical genetic approach (Goldstein and Brown). 1986; 108:174-81 (State of the art)

Hyperoxia
Hyperoxic lung injury in mice: a possible protective role for prostacyclin (Smith et al). 1986; 108:479-88

Hypertension
Plasma $1,25(OH)_2D_3$ response to parathyroid hormone, cyclic adenosine monophosphate, and phosphorus depletion in the spontaneously hypertensive rat (Young et al). 1986; 108:562-6
Role of portasystemic shunts in the hyperkinetic circulation of the portal hypertensive rat (Braillon et al). 1986; 108:543-48

Hypocalcemia
1,25-Dihydroxyvitamin D_3 increases serum and tissue accumulation of aluminum in rats (Burnatowska-Hledin et al). 1986; 108:96-102

I

I-cell disease
Lysosomal hydrolases in blood-derived macrophages of patients with I-cell disease (Yatziv et al). 1986; 108:365-8

Immunity
Immune dysregulation in human tuberculosis (Ellner). 1986; 108:142-9

Immunoglobulin
Activity of intravenous immune globulins against *Klebsiella* (Cryz et al). 1986; 108:182-9
Immunoglobulin G_4 in pigeon breeder's disease (Kitt et al). 1986; 108:442-7

Immunosuppression
Hyperferremia in immunosuppressed patients with acute nonlymphocytic leukemia and the risk of infection (Gordeuk et al). 1986; 108:466-72

Indomethacin
Effect of cimetidine on indomethacin-induced damage in cultured rat gastric mucosal cells: comparison with prostaglandin (Hiraishi et al). 1986; 108:608-15

Infant
Neutrophil defect associated with malignant infantile osteopetrosis (Beard et al). 1986; 108:498-505
Polyethylene glycol polymers of low molecular weight as probes of intestinal permeability. II. Application to infants and children with intestinal disease (Lifschitz et al). 1986; 108:37-43

Infection
Hyperferremia in immunosuppressed patients with acute nonlymphocytic leukemia and the risk of infection (Gordeuk et al). 1986; 108:466-72
Successful treatment of murine cytomegalovirus disease does not prevent latent virus infection (Katzenstein et al). 1986; 108:155-60
Treatment of bacterial infections with specific antisera: a venerable idea born again (Graham). 1986; 108:172-3 (Editorial)
Urinary proteinase activity in patients with multiple traumatic injuries, sepsis, or acute renal failure (Wanner et al). 1096; 108:224-9

Inflammatory bowel disease
Chromium 51–ethylenediaminetetraacetate test: a useful test in the assessment of inflammatory bowel disease (O'Morain et al). 1986; 108:430-5

Injury
Role of glutathione in protecting endothelial cells against hydrogen peroxide oxidant injury (Andreoli et al). 1986; 108:190-8
Urinary proteinase activity in patients with multiple traumatic injuries, sepsis, or acute renal failure (Wanner et al). 1986; 108:224-9

Interleukin-
Interleukin-2–induced chemotaxis of human T-lymphocytes (Robbins et al). 1986; 108:340-5

Intestine
Drugs and the intestinal absorption of folate (Beck). 1986; 108:263-4 (Editorial)
Effect of moderate prolonged ethanol ingestion on intestinal disaccharidase activity and histology (Zarling et al). 1986; 108:7-10
Human and canine ventricular vasoactive intestinal polypeptide: decrease with heart failure (Unverferth et al). 1986; 108:11-6
Polyethylene glycol polymers of low molecular weight as probes of intestinal permeability. II. Application to infants and children with intestinal disease (Lifschitz et al). 1986; 108:37-43

Intravascular volume
Alterations of intravascular volume: influence on renal susceptibility to ischemic injury (Zager). 1986;s36108:60-9
Iron
Absorption of carbonyl iron (Huebers et al). 1986; 108:473-8
Iron binding, internalization, and fate in human alveolar macrophages (McGowan et al). 1986; 108:587-95
Iron release from transferrin: synergistic interaction between adenosine triphosphate and an ammonium sulfate fraction of hemolysate (Pollack and Weaver). 1986; 108:411-4
Ischemia
Alterations of intravascular volume: influence on renal susceptibility to ischemic injury (Zager). 1986; 108:60-9
Effect of allopurinol on the renovascular responses to adenosine (Macias-Nunez et al). 1986; 108:30-6
Effect of theophylline on the initiation phase of postischemic acute renal failure in rats (Lin et al). 1986; 108:150-4
Isotope
In vivo gallbladder absorption: a new dual-isotope technique (Conter et al). 1986; 108:360-4

K

Kidney
Alterations of intravascular volume: influence on renal susceptibility to ischemic injury (Zager). 1986; 108:60-9
Effect of acivicin on glutamine transport by rat renal brush border membrane vesicles (Sastrasinh and Sastrasinh). 1986; 108: 301-8
Effect of allopurinol on the renovascular responses to adenosine (Macias-Nunez et al). 1986; 108:30-6
Role of renal prostaglandins in normal and nephrotic rats with diet-induced hyperfiltration (Benigni et al). 1986; 108:230-40
Urinary excretion and renal production of prostaglandins E_2, $F_{2\alpha}$, and thromboxane B_2 in experimental diabetes mellitus (Bunke and Itskovitz). 1986; 108:332-9
Kinetics
Kinetics of albumin in cirrhosis (Buhac). 1986; 108:517-8; (Rector) 1986; 108:518 (Letter reply)
Klebsiella
Activity of intravenous immune globulins against *Klebsiella* (Cryz et al). 1986; 108:182-9

L

β-Lactam penicillins
In vitro comparison of antiplatelet effects of β-lactam penicillins (Fletcher et al). 1986; 108:217-23
Lactase
Effect of moderate prolonged ethanol ingestion on intestinal disaccharidase activity and histology (Zarling et al). 1986; 108:7-10
Lakeside Hospital
Lakeside Hospital (Warren). 1986; 108:76 (Cover illus. note)
Letters
Letters. 1986; 108:517-8
Leukemia
Hyperferremia in immunosuppressed patients with acute nonlymphocytic leukemia and the risk of infection (Gordeuk et al). 1986; 108:466-72
Leukocytes
Aggregated C-reactive protein binds to human polymorphonuclear leukocytes and potentiates Fc receptor–mediated chemiluminescence (Zeller et al). 1986; 108:567-76
Leukotriene
Comparison of cutaneous and bronchial reactivity to leukotriene D_4 in humans (Greenberger et al). 1986; 108:70-5
Lipoxygenation
Lipoxygenation of arachidonic acid by differentiated and undifferentiated human promyelocytic HL-60 cells (Ziboh et al). 1986; 108:161-6
Liquid chromatography
Rapid cation-exchange high-performance liquid chromatographic procedure for the separation and quantitation of hemoglobins S, C, and O Arab in cord blood samples (Wilson et al). 1986; 108:138-41
Lithium
In vivo and in vitro modulation of megakaryocytopoiesis and stromal colony formation by lithium (Gallicchio et al). 1986; 108:199-205
Liver
Clinical significance of hippurate-synthesizing capacity in surgical patients with liver disease: a metabolic tolerance test (Aoyama et al). 1986; 108:456-60
Effect of coupling of 2-nor-2 formylpyridoxal 5′-phosphate to stroma-free hemoglobin on oxygen affinity and tissue oxygenation: studies in the isolated perfused rat liver under conditions of normoxia and stagnant hypoxia (van der Plas et al). 1986; 108:109-16
Effect of sodium taurocholate on amiloride-inhibitable sodium uptake and on intracellular pH of isolated rat hepatocytes (Bear et al). 1986; 108:109-16
Kinetics of albumin in cirrhosis (Buhac). 1986; 108:517-8 (Letter); (Rector) 1986; 108:518 (Letter reply)
Lung
Absence o lung edema in nephrotic rats (Rackow et al). 1986; 108:349-53
Hyperoxic lung injury in mice: a possible protective role for prostacyclin (Smith et al). 1986; 108:479-88
Lymphocyte
1,25-Dihydroxyvitamin D_3 receptors in lymphocytes from patients with rheumatoid arthritis (Manolagas et al). 1986; 108:596-600
Interleukin-2–induced chemotaxis of human T-lymphocytes (Robbins et al). 1986; 108:340-5
Methionine synthetase activity of human lymphocytes both replete in and depleted of vitamin B_{12} (Hall et al). 1986; 108:325-31
Lysosomal hydrolase
Lysosomal hydrolases in blood-derived macrophages of patients with I-cell disease (Yatziv et al). 1986; 108:365-8

M

Macrophages
In vitro formation of activators for prostaglandin synthesis by neutrophils and macrophages from humans and guinea pigs (Marshall and Lands). 1986; 108:525-34
Iron binding, internalization, and fate in human alveolar macrophages (McGowan et al). 1986; 108:587-95
Lysosomal hydrolases in blood-derived macrophages of patients with I-cell disease (Yatziv et al). 1986; 108:365-8
Malignancy
Morphometric evaluation of thrombogenesis by microvesicles from human tumor cell lines with thrombin-dependent (U87MG) and adenosine diphosphate–dependent (SKNMC) platelet-activating mechanisms (Bastida et al). 1986; 108:622-7
Neutrophil defect associated with malignant infantile osteopetrosis (Beard et al). 1986; 108:498-505
Megakaryocyte
Effects of recombinant erythropoietin on murine megakaryocytic colony formation in vitro (Clark and Dessypris). 1986; 108: 423-9
In vivo and in vitro modulation of megakaryocytopoiesis and stromal colony formation by lithium (Gallicchio et al). 1986; 108:199-205
Metabolism
Clinical significance of hippurate-synthesizing capacity in surgical patients with liver disease: a metabolic tolerance test (Aoyama et al). 1986; 108:456-60
Methionine synthetase
Methionine synthetase activity of human lymphocytes both replete in and depleted of vitamin B_{12} (Hall et al). 1986; 108:325-31
Methylprednisolone
Methylprednisolone accelerates the ontogeny of sodium-taurocholate cotransport in rat ileal brush border membranes (Barnard and Ghishan). 1986; 108:549-55

Midwest Society for Pediatric Research
Program. 1986; 108:371-402
Monocyte
Postoperative elevation of human peripheral blood monocyte tissue factor coagulant activity (Blakowski et al). 1986; 108:117-20
Mucosa
Effect of moderate prolonged ethanol ingestion on intestinal disaccharidase activity and histology (Zarling et al). 1986; 108:7-10
Mucous glycoprotein
Serine proteases stimulate mucous glycoprotein release from hamster tracheal ring organ culture (Niles et al). 1986; 108:489-97
Mycobacteria
Immune dysregulation in human tuberculosis (Ellner). 1986; 108:142-9

N

Nephrosis
Absence of lung edema in nephrotic rats (Rackow et al). 1986; 108:349-53
Role of renal prostaglandins in normal and nephrotic rats with diet-induced hyperfiltration (Benigni et al). 1986; 108:230-40
Neutrophil
Effect of smoking on plasma neutrophil elastase levels (Abboud et al). 1986; 108:294-300
In vitro formation of activators for prostaglandin synthesis by neutrophils and macrophages from humans and guinea pigs (Marshall and Lands). 1986; 108:525-34
Neutrophil defect associated with malignant infantile osteopetrosis (Beard et al). 1986; 108:498-505
Verapamil impairs human neutrophil chemotaxis by a non-calcium-mediated mechanism (Pennington et al). 1986; 108:44-52
Nicotine
Platelet prostacyclin binding in smokers (Jaschonek et al). 1986; 108:88-95
Nitrogen
Simple method for monitoring 24-hour urinary urea nitrogen excretion (Middendorf et al). 1986; 108:577-80
Nitrous oxide
Nitrous oxide and vitamin B_{12} deficiency interact adversely on rat growth (Van de List et al). 1986; 108:346-8
2-Nor-2-formylpyridoxal 5′-phosphate
Effect of coupling of 2-nor-2-formylpyridoxal 5′-phosphate to stroma-free hemoglobin on oxygen affinity and tissue oxygenation: studies in the isolated perfused rat liver under conditions of normoxia and stagnant hypoxia (van der Plas et al). 1986; 108:253-60
Prolonged vascular retention of a hemoglobin solution modified by cross-linking with 2-nor-2-formylpyridoxal 5′-phosphate (Bleeker et al). 1986; 108:448-55

O

$1,25(OH)_2D_3$
1,25-Dihydroxyvitamin D_3 increases serum and tissue accumulation of aluminum in rats (Burnatowska-Hledin et al). 1986; 108:96-102
1,25-Dihydroxyvitamin D_3 receptors in lymphocytes from patients with rheumatoid arthritis (Manolagas et al). 1986; 108:596-600
Plasma $1,25(OH)_2D_3$ response to parathyroid hormone, cyclic adenosine monophosphate, and phosphorus depletion in the spontaneously hypertensive rat (Young et al). 1986; 108:562-6
Osteopetrosis
Neutrophil defect associated with malignant infantile osteopetrosis (Beard et al). 1986; 108:498-505
Oxygen affinity
Effect of coupling of 2-nor-2-formylpyridoxal 5′-phosphate to stroma-free hemoglobin on oxygen affinity and tissue oxygenation: studies in the isolated perfused rat liver under conditions of normoxia and stagnant hypoxia (van der Plas et al). 1986; 108:253-60

P

Pancreatitis
Urine protein excretion in acute pancreatitis (Meier and Levitt). 1986; 108:628-34
Parathyroid hormone
Plasma $1,25(OH)_2D_3$ response to parathyroid hormone, cyclic adenosine monophosphate, and phosphorus depletion in the spontaneously hypertensive rat (Young et al). 1986; 108:562-6
Peroxide oxidant
Role of glutathione in protecting endothelial cells against hydrogen peroxide oxidant injury (Andreoli et al). 1986; 108:190-8
pH
Effect of sodium taurocholate on amiloride-inhibitable sodium uptake and on intracellular pH of isolated rat hepatocytes (Bear et al). 1986; 108:109-16
Effects of pH on adrenal angiotensin receptors and responses (Carroll et al). 1986; 108:23-9
Phosphorus
Plasma $1,25(OH)_2D_3$ response to parathyroid hormone, cyclic adenosine monophosphate, and phosphorus depletion in the spontaneously hypertensive rat (Young et al). 1986; 108:562-6
Pigeon breeder's disease
Immunoglobulin G_4 in pigeon breeder's disease (Kitt et al). 1986; 108:442-7
Plasma
Effect of smoking on plasma neutrophil elastase levels (Abboud et al). 1986; 108:294-300
Plasma $1,25(OH)_2D_3$ response to parathyroid hormone, cyclic adenosine monophosphate, and phosphorus depletion in the spontaneously hypertensive rat (Young et al). 1986; 108:562-6
Presence of a plasma transthyretin (prealbumin) variant in familial amyloidotic polyneuropathy in a kindred of Greek origin (Saraiva et al). 1986; 108:17-22
Plasminogen activator
Fibrinolysis in health and disease: abnormal levels of plasminogen activator, plasminogen activator inhibitor, and protein C in thrombotic thrombocytopenic purpura (Glas-Greenwalt et al). 1986; 108:415-22
Inhibition of one-chain and two-chain forms of human tissue-type plasminogen activator by the fast-acting inhibitor of plasminogen activator in vitro and in vivo (Colucci et al). 1986; 108:53-9
Platelet
Effect of forskolin on the maintenance of platelet properties during storage (Siegl and Moroff). 1986; 108:354-9
In vitro comparison of antiplatelet effects of β-lactam penicillins (Fletcher et al). 1986; 108:217-23
Inhibition of canine platelet aggregation by barbiturates (O'Rourke et al). 1986; 108:206-12
Platelet dysfunction in uremia. II. Correction by arachidonic acid of the impaired exposure of fibrinogen receptors by adenosine diphosphate or collagen (Di Minno et al). 1986; 108:246-52
Platelet prostacyclin binding in smokers (Jaschonek et al). 1986; 108:88-95
Polyethylene glycol
Polyethylene glycol polymers of low molecular weight as probes of intestinal permeability. II. Application to infants and children with intestinal disease (Lifschitz et al). 1986; 108:37-43
Polymorphonuclear leukocyte
Aggregated C-reactive protein binds to human polymorphonuclear leukocytes and potentiates Fc receptor–mediated chemiluminescence (Zeller et al). 1986; 108:567-76
Polyneuropathy
Presence of a plasma transthyretin (prealbumin) variant in familial amyloidotic polyneuropathy in a kindred of Greek origin (Saraiva et al). 1986; 108:17-22
Polypeptide
Human and canine ventricular vasoactive intestinal polypeptide: decrease with heart failure (Unverferth et al). 1986; 108:11-6
Portal hypertension
Role of portasystemic shunts in the hyperkinetic circulation of the portal hypertensive rat (Braillon et al). 1986; 108:543-48

Portasystemic shunt
Role of portasystemic shunts in the hyperkinetic circulation of the portal hypertensive rat (Braillon et al). 1986; 108:543-48
Postoperative period
Postoperative elevation of human peripheral blood monocyte tissue factor coagulant activity (Blakowski et al). 1986; 108:117-20
Potassium
Failure of potassium adaptation in vivo in the colon of aldosterone-deficient rats (Martin et al). 1986; 108:241-5
Prealbumin
Presence of a plasma transthyretin (prealbumin) variant in familial amyloidotic polyneuropathy in a kindred of Greek origin (Saraiva et al). 1986; 108:17-22
Presidential address
Wither we goest? Notes of a society watcher plus other comments and thoughts (Schiff). 1986; 108:3-6
Program
Central Society for Clinical Research; Midwest Section, American Federation for Clinical Research; Midwest Society for Pediatric Research; Midwest Region, Society for Investigative Dermatology: Combined Annual Meeting Program 1986; 108:371-402
Promyelocyte
Lipoxygenation of arachidonic acid by differentiated and undifferentiated human promyelocytic HL-60 cells (Ziboh et al). 1986; 108:161-6
Prostacyclin
Hyperoxic lung injury in mice: a possible protective role for prostacyclin (Smith et al). 1986; 108:479-88
Platelet prostacyclin binding in smokers (Jaschonek et al). 1986; 108:88-95
Prostaglandin; *see also* **Prostacyclin**
Effect of cimetidine on indomethacin-induced damage in cultured rat gastric mucosal cells: comparison with prostaglandin (Hiraishi et al). 1986; 108:608-15
In vitro formation of activators for prostaglandin synthesis by neutrophils and macrophages from humans and guinea pigs (Marshall and Lands). 1986; 108:525-34
Role of renal prostaglandins in normal and nephrotic rats with diet-induced hyperfiltration (Benigni et al). 1986; 108:230-40
Urinary excretion and renal production of prostaglandins E_2, $F_{2\alpha}$, and thromboxane B_2 in experimental diabetes mellitus (Bunke and Itskovitz). 1986; 108:332-9
Urinary inhibitor of the ammoniagenic response to acute acidosis is a prostaglandin (Tannen and Goyal). 1986; 108:277-85
Prostanoid
Free radicals and prostanoid synthesis (Sedor). 1986; 108:521-2 (Editorial)
Protein
Aggregated C-reactive protein binds to human polymorphonuclear leukocytes and potentiates Fc receptor–mediated chemiluminescence (Zeller et al). 1986; 108:567-76
Fibrinolysis in health and disease: abnormal levels of plasminogen activator, plasminogen activator inhibitor, and protein C in thrombotic thrombocytopenic purpura (Glas-Greenwalt et al). 1986; 108:415-22
Urine protein excretion in acute pancreatitis (Meier and Levitt). 1986; 108:628-34
Proteinase activity
Urinary proteinase activity in patients with multiple traumatic injuries, sepsis, or acute renal failure (Wanner et al). 1986; 108:224-9
Purpura
Fibrinolysis in health and disease: abnormal levels of plasminogen activator, plasminogen activator inhibitor, and protein C in thrombotic thrombocytopenic purpura (Glas-Greenwalt et al). 1986; 108:415-22
Pyridoxal phosphate
Effect of coupling of 2-nor-2-formylpyridoxal 5′-phosphate to stroma-free hemoglobin on oxygen affinity and tissue oxygenation: studies in the isolated perfused rat liver under conditions of normoxia and stagnant hypoxia (van der Plas et al). 1096; 108:253-60
Prolonged vascular retention of a hemoglobin solution modified by cross-linking with 2-nor-2-formylpyridoxal 5′-phosphate (Bleeker et al). 1986; 108:448-55
Serum aspartate aminotransferase storage and the effect of pyridoxal phosphate (Niblock et al). 1986; 108:461-5

Q

Quinidine
Cumulative effects of quinidine and aspirin on bleeding time and platelet α_2-adrenoceptors: potential mechanism of bleeding diathesis in patients receiving this combination (Lawson et al). 1986; 108:581-86

R

Radical
Free radicals and prostanoid synthesis (Sedor). 1986; 108:521-2 (Editorial)
Receptor
Aggregated C-reactive protein binds to human polymorphonuclear leukocytes and potentiates Fc receptor–mediated chemiluminescence (Zeller et al). 1986; 108:567-76
1,25-Dihydroxyvitamin D_3 receptors in lymphocytes from patients with rheumatoid arthritis (Manolagas et al). 1986; 108:596-600
Recombination
Acceleration of wound healing by recombinant human urogastrone (epidermal growth factor) (Franklin et al). 1986; 108:103-8
Effects of recombinant erythropoietin on murine megakaryocytic colony formation in vitro (Clark and Dessypris). 1986; 108:423-9
Red blood cell; *see* **Erythrocyte**
Renal disease; *see also* **Kidney**
Alterations of intravascular volume: influence on renal susceptibility to ischemic injury (Zager). 1986; 108:60-9
Effect of allopurinol on the renovascular responses to adenosine (Macias-Nunez et al). 1986; 108:30-6
Effect of theophylline on the initiation phase of postischemic acute renal failure in rats (Lin et al). 1986; 108:150-4
Platelet dysfunction in uremia. II. Correction by arachidonic acid of the impaired exposure of fibrinogen receptors by adenosine diphosphate or collagen (Di Minno et al). 1986; 108:246-52
Renal prostaglandin
Role of renal prostaglandins in normal and nephrotic rats with diet-induced hyperfiltration (Benigni et al). 1986; 108:230-40
Reptilase
Effect of hydroxyethyl starch on the structure of thrombin-and reptilase-induced fibrin gels (Carr). 1986; 108:556-61
Rheumatic fever
Acute rheumatic fever and poststreptococcal glomerulonephritis in an open population: comparative studies of epidemiology and bacteriology (Berrios et al). 1986; 108:535-42
The mystery of acute rheumatic fever and poststreptococcal glomerulonephritis (Denny). 1986; 108:523-4 (Editorial)
Rheumatoid arthritis
1,25-Dihydroxyvitamin D_3 receptors in lymphocytes from patients with rheumatoid arthritis (Manolagas et al). 1986; 108:596-600

S

Salmonella typhi
Role of the Vi antigen of *Salmonella typhi* in resistance to host defense in vitro (Looney and Steigbigel). 1986; 108:506-16
Sepsis; *see also* **Infection**
Urinary proteinase activity in patients with multiple traumatic injuries, sepsis, or acute renal failure (Wanner et al). 1986; 108:224-9
Serine protease
Inhibition of one-chain and two-chain forms of human tissue-type plasminogen activator by the fast-acting inhibitor of plasminogen activator in vitro and in vivo (Colucci et al). 1986; 108:53-9

Serine proteases stimulate mucous glycoprotein release from hamster tracheal ring organ culture (Niles et al). 1986; 108:489-97

Serum

Measurement of bilirubin-protein conjugates in serum and application to human and rat sera (Blanckaert et al). 1986; 108:77-87

Serum aspartate aminotransferase storage and the effect of pyridoxal phosphate (Niblock et al). 1986; 108:461-5

Shunt

Role of portasystemic shunts in the hyperkinetic circulation of the portal hypertensive rat (Braillon et al). 1986; 108:543-48

SKNMC cell line

Morphometric evaluation of thrombogenesis by microvesicles from human tumor cell lines with thrombin-dependent (U87MG) and adenosine diphosphate–dependent (SKNMC) platelet-activating mechanisms (Bastida et al). 1986; 108:622-7

Smith, Fred M.

Fred M. Smith (1888-1946) (Wooley). 1986; 108:635-6 (Cover illus. note)

Smoking

Effect of smoking on plasma neutrophil elastase levels (Abboud et al). 1986; 108:294-300

Platelet prostacyclin binding in smokers (Jaschonek et al). 1986; 108:88-95

Society for Investigative Dermatology, Midwest Region

Program. 1986; 108:371-402

Sodium

Effect of sodium taurocholate on amiloride-inhibitable sodium uptake and on intracellular pH of isolated rat hepatocytes (Bear et al). 1986; 108:109-16

Methylprednisolone accelerates the ontogeny of sodium-taurocholate cotransport in rat ileal brush border membranes (Barnard and Ghishan). 1986; 108:549-55

Starch

Effect of hydroxyethyl starch on the structure of thrombin- and reptilase-induced fibrin gels (Carr). 1986; 108:556-61

Streptococci

Acute rheumatic fever and poststreptococcal glomerulonephritis in an open population: comparative studies of epidemiology and bacteriology (Berrios et al). 1986; 108:535-42

The mystery of acute rheumatic fever and poststreptococcal glomerulonephritis (Denny). 1986; 108:523-4 (Editorial)

Stroma-free hemoglobin

Effect of coupling of 2-nor-2-formylpyridoxal 5′-phosphate to stroma-free hemoglobin on oxygen affinity and tissue oxygenation: studies in the isolated perfused rat liver under conditions of normoxia and stagnant hypoxia (van der Plas et al). 1986; 108:253-60

Synergistic toxicity of endotoxin and hemoglobin (White et al). 1986; 108:132-7

Stromal colony formation

In vivo and in vitro modulation of megakaryocytopoiesis and stromal colony formation by lithium (Gallicchio et al). 1986; 108:199-205

Sulfobromophthalein

Effect of tauroursodeoxycholate on the biliary transport maximum of sulfobromophthalein in the rat (Kanai and Kitani). 1986; 108:601-7

Sweat bromide

Sweat bromide excretion in cystic fibrosis (Miller et al). 1986; 108:406-10

Synergism

Iron release from transferrin: synergistic interaction between adenosine triphosphate and an ammonium sulfate fraction of hemolysate (Pollack and Weaver). 1986; 108:411-4

T

Taurocholate

Effect of sodium taurocholate on amiloride-inhibitable sodium uptake and on intracellular pH of isolated rat hepatocytes (Bear et al). 1986; 108:109-16

Methyprednisolone accelerates the ontogeny of sodium-taurocholate cotransport in rat ileal brush border membranes (Barnard and Ghishan). 1986; 108:549-55

Tauroursodeoxycholate

Effect of tauroursodeoxycholate on the biliary transport maximum of sulfobromophthalein in the rat (Kanai and Kitani). 1986; 108:601-7

Theophylline

Effect of theophylline on the initiation phase of postischemic acute renal failure in rats (Lin et al). 1986; 108:150-4

Thrombin

Effect of hydroxyethyl starch on the structure of thrombin-and reptilase-induced fibrin gels (Carr). 1986; 108:556-61

Morphometric evaluation of thrombogenesis by microvesicles from human tumor cell lines with thrombin-dependent (U87MG) and adenosine diphosphate–dependent (SKNMC) platelet-activating mechanisms (Bastida et al). 1986; 108:622-7

Thrombocytopenic purpura

Fibrinolysis in health and disease: abnormal levels of plasminogen activator, plasminogen activator inhibitor, and protein C in thrombotic thrombocytopenic purpura (Glas-Greenwalt et al). 1986; 108:415-22

Thrombogenesis

Morphometric evaluation of thrombogenesis by microvesicles from human tumor cell lines with thrombin-dependent (U87MG) and adenosine diphosphate–dependent (SKNMC) platelet-activating mechanisms (Bastida et al). 1986; 108:622-7

Thrombotic thrombocytopenic purpura

Fibrinolysis in health and disease: abnormal levels of plasminogen activator, plasminogen activator inhibitor, and protein C in thrombotic thrombocytopenic purpura (Glas-Greenwalt et al). 1986; 108:415-22

Thromboxane

Urinary excretion and renal production of prostaglandins E_2, $F_{2\alpha}$, and thromboxane B_2 in experimental diabetes mellitus (Bunke and Itskovitz). 1986; 108:332-9

Tissue factor coagulant

Postoperative elevation of human peripheral blood monocyte tissue factor coagulant activity (Blakowski et al). 1986; 108:117-20

Tissue oxygenation

Effect of coupling of 2-nor-2-formylpyridoxal 5′-phosphate to stroma-free hemoglobin on oxygen affinity and tissue oxygenation: studies in the isolated perfused rat liver under conditions of normoxia and stagnant hypoxia (van der Plas et al). 1986; 108:253-60

T-lymphocyte

Interleukin-2–induced chemotaxis of human T-lymphocytes (Robbins et al). 1986; 108:340-5

Tobacco

Effect of smoking on plasma neutrophil elastase levels (Abboud et al). 1986; 108:294-300

Platelet prostacyclin binding in smokers (Jaschonek et al). 1986; 108:88-95

Toxicity

Synergistic toxicity of endotoxin and hemoglobin (White et al). 1986; 108:132-7

Toxicity of human hemoglobin solution infused into rabbits (White et al). 1986; 108:121-31

Tracheal ring

Serine proteases stimulate mucous glycoprotein release from hamster tracheal ring organ culture (Niles et al). 1986; 108:489-97

Transferrin

Iron release from transferrin: synergistic interaction between adenosine triphosphate and an ammonium sulfate fraction of hemolysate (Pollack and Weaver). 1986; 108:411-4

Transthyretin variant

Presence of a plasma transthyretin (prealbumin) variant in familial amyloidotic polyneuropathy in a kindred of Greek origin (Saraiva et al). 1986; 108:17-22

Trauma

Urinary proteinase activity in patients with multiple traumatic in-

juries, sepsis, or acute renal failure (Wanner et al). 1986; 108:224-9

Triamterene
Competitive inhibition of folic acid absorption in rat jejunum by triamterene (Zimmerman et al). 1986; 108:272-6

Tuberculosis
Immune dysregulation in human tuberculosis (Ellner). 1986; 108:142-9

Tumor
Morphometric evaluation of thrombogenesis by microvesicles from human tumor cell lines with thrombin–dependent (U87MG) and adenosine diphosphate–dependent (SKNMC) platelet-activating mechanisms (Bastida et al). 1986; 108:622-7

U

U87MG cell line
Morphometric evaluation of thrombogenesis by microvesicles from human tumor cell lines with thrombin-dependent (U87MG) and adenosine diphosphate–dependent (SKNMC) platelet-activating mechanisms (Bastida et al). 1986; 108:622-7

Umbilical cord blood
Rapid cation-exchange high-performance liquid chromatographic procedure for the separation and quantitation of hemoglobins S, C, and O Arab in cord blood samples (Wilson et al). 1986; 108:138-41

University Hospital
The first university-owned hospital (1869): Ann Arbor, Michigan (Warren). 1986; 108:519-20

Urea nitrogen
Simple method for monitoring 24-hour urinary urea nitrogen excretion (Middendorf et al). 1986; 108:577-80

Uremia
Platelet dysfunction in uremia. II. Correction by arachidonic acid of the impaired exposure of fibrinogen receptors by adenosine diphosphate or collagen (Di Minno et al). 1986; 108:246-52

Uridine diphosphoglucuronyltransferase
Bilirubin conjugate excretion and bilirubin uridine diphosphoglucuronyltransferase activity in nonjaundiced homozygous and heterozygous Gunn rats (Gourley et al). 1986; 108:436-41

Urine
Urinary proteinase activity in patients with multiple traumatic injuries, sepsis, or acute renal failure (Wanner et al). 1986; 108:224-9
Urine protein excretion in acute pancreatitis (Meier and Levitt). 1986; 108:628-34

Urogastrone
Acceleration of wound healing by recombinant human urogastrone (epidermal growth factor) (Franklin et al). 1986; 108:103-8

V

Vascular retention
Prolonged vascular retention of a hemoglobin solution modified by cross-linking with 2-nor-2-formylpyridoxal 5′-phosphate (Bleeker et al). 1986; 108:448-55

Vasoactive intestinal polypeptide
Human and canine ventricular vasoactive intestinal polypeptide: decrease with heart failure (Unverferth et al). 1986; 108:11-6

Ventricle
Human and canine ventricular vasoactive intestinal polypeptide: decrease with heart failure (Unverferth et al). 1986; 108:11-6

Verapamil
Verapamil impairs human neutrophil chemotaxis by a non-calcium-mediated mechanism (Pennington et al). 1986; 108:44-52

Vesiculation
Red cell vesiculation–a common membrane physiologic event (Wagner et al). 1986; 108:315-24

Vi antigen
Role of the Vi antigen of *Salmonella typhi* in resistance to host defense in vitro (Looney and Steigbigel). 1986; 108:506-16

Virus infection
Successful treatment of murine cytomegalovirus disease does not prevent latent virus infection (Katzenstein et al). 1986; 108:155-60

Vitamin B_{12}
Methionine synthetase activity of human lymphocytes both replete in and depleted of vitamin B_{12} (Hall et al). 1986; 108:325-31
Nitrous oxide and vitamin B_{12} deficiency interact adversely on rat growth (Van de List et al). 1986; 108:346-8

Vitamin D; *see* **1,25-Dihydroxyvitamin D_3**

W

Wound healing
Acceleration of wound healing by recombinant human urogastrone (epidermal growth factor) (Franklin et al). 1986; 108:103-8

Z

Zinc
Effect of moderate prolonged ethanol ingestion on intestinal disaccharidase activity and histology (Zarling et al). 1986; 108:7-10
